1624 South Pioneer Road
Salt Lake City, Utah 84104

Dear Mr. Ruf:

Re: Taylor Placer Property reclamation, ACT/019/016, Grand County, Utah *NOT COAL*

The Division is in receipt of your letter of October 22, 1984, stating that operations at the Taylor Placer Property have been suspended and that the area will be reclaimed. We are sorry that the operation did not work out to your satisfaction.

The Division has the following requirements for reclamation of the area:

1. The entire area, including all cuts, ponds, roads and pads should be regraded to a stable configuration. Highwalls do not need to be completely backfilled but must be left at a slope of 45° or less.
2. The drainage that was impounded by the ponds at the Nancy site must be restored.
3. Topsoil that was saved should be used to cover as much of the area as possible. If the area is compacted after regrading it should be ripped or scarified prior to the application of topsoil. Fertilizer or other amendments should be added at this time.
4. The area should this be seeded with the following seed mixture:

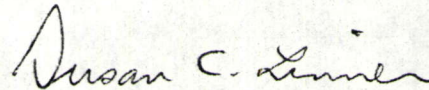

<u>lbs. Pure Live Seed</u>	<u>Species</u>
4	Bluebench Wheatgrass
5	Standard Crested Wheat Grass
3	Russian Wild Rye
3	Yellow Sweet Clover

Page 2
Mr. Wilford Ruf
October 25, 1984

This is a total of 15 pounds pure live seed per acre. If the area is drill seeded slightly less could be used. If the area is broadcast seeded it should be dragged afterwards so that the seeds are lightly covered. Optimum time for reclamation is late fall so the Division requests that this work be completed by November 30, 1984.

Please notify us when it is finished so that the Division may inspect the site. Thank you for your cooperation.

Sincerely,

A handwritten signature in cursive script, reading "Susan C. Linner".
